Mining the MLB Archives

The Power of DIAMOND

❖ Capture the Video Assets from Multiple Sources

- ❖ 'Live' Game Recordings and other Game Feeds (Melts, BallParkCam, etc.)
- ❖ Archive, Interviews, Field Tapes

❖ Catalog the Video Content

- ❖ Across Multiple Databases
- ❖ With Content Expert Loggers

❖ Search

- ❖ Across Multiple Collections of Information
- ❖ Customized for the Individual End User

❖ Repurpose and Monetize the Video Content

- ❖ High-speed Access to Current and Historical Content
- ❖ Repurposing of Archives
 - ❖ By the League: MLB Productions Programming, Partner Programming, and 3rd Party Licensing
 - ❖ By the Network: In-game Content; Broadcast Highlights

❖ Protect the Investment

- ❖ Store On Site - Instant Access, Quick Turnaround for Production / Broadcast
- ❖ Archive Off Site - Historical Preservation, Disaster Protection

- Select (All/None)**
- 20110501_tor_nya_1** [Video Icon]
 - ☐ Derek Jeter hit by pitch.
- 20110515_bos_nya_1** [Video Icon]
 - ☐ Derek Jeter hit by pitch. Analysis on whether or not the ball hit D. Jeter or if he faked getting hit.
- 20110601_nya_oak_1** [Video Icon]
 - ☐ Derek Jeter hit by pitch in the foot.
- 20110609_bos_nya_1** [Video Icon]
 - ☐ Derek Jeter hit by pitch. Analysis on the HBP not being intentional, but the Yankees have been hit by pitches often and they are tired of it.
- 20110731_bal_nya_1** [Video Icon]
 - ☐ Derek Jeter hit by pitch on fastball from J. Arrieta. Analysis on D. Jeter, hit right on fingers, and was hit on hand last night by grounder. Replay of D. Jeter jamming fingers on grounder last night. B. Showalter spits out his gum in d/o.
- 20110807_nya_bos_1** [Video Icon]
 - ☐ Derek Jeter hit by pitch on fastball by M. Albers. Analysis on some pitchers will throw at guys who try to bunt after HR's, but probably not the case here.

Keeping Up With the Technology...

IBM's Approach to BIG Data

Source: IBM Research Presentation

MLB Network's Approach to BIG Data

- 1 Petabyte of Game Footage was Stored in our GV Library every 10 Weeks during 2011...
- 3.6 Petabytes of Data was Added to our GV Library in 2011...
- Over 12 Petabytes of Data is currently in the GV Library Today...
- In 2012, we will add 4.8+ Petabytes of Data to the GV Library...
- 20-30% increase in amount of Content added to the Library, year over year... and not slowing down...
- By the end of 2013 Season, the GV library will be approaching 20+ Petabytes of Data...

Testing Workflows in the Broadcast Environment

❖ Final Cut Pro Project Archiving

- ❖ Developed a testing plan and were successful in deploying an 'Operator controlled' project archive workflow within Final Cut Pro Edit Environment.

❖ Proxy Storage for Grass Valley

- ❖ Currently in development and testing of Proxy 'On-Line' disk environment being extended into 'On-Line' mixed Disk / Tape environment for 'Long-Tail Proxy Content'

STRONGBOX T1

- ⦿ 1 U server
- ⦿ Supports 200 million files
- ⦿ Maximum File transfer Rate: 160 MB/s

STRONGBOX T3

- ⦿ 3 U server
- ⦿ Supports up to 5 billion files
- ⦿ Maximum File transfer Rate: 600 MB/s

Emerging LTO Tape Technologies

Significant Cost Reducing Technologies for Big Media...

LTFS

Linear Tape File System

- Self describing file system
- Faster access to data
- Simple drag and drop
- Compatibility across environment
- Increased data mobility
- A single storage media standard

The major (and I would almost classify it as a breakthrough) advance that LTFS provides is that LTFS changes tape from application dependent to application independent.
