Intelligent Storage

Chris Powers, Vice President
HPE Storage

Advancing the way people live and work

Creating a world where everything computes

Everyone and everything
will be connected and secure

Intelligence will be
embedded everywhere

Through data, everything
will be understood

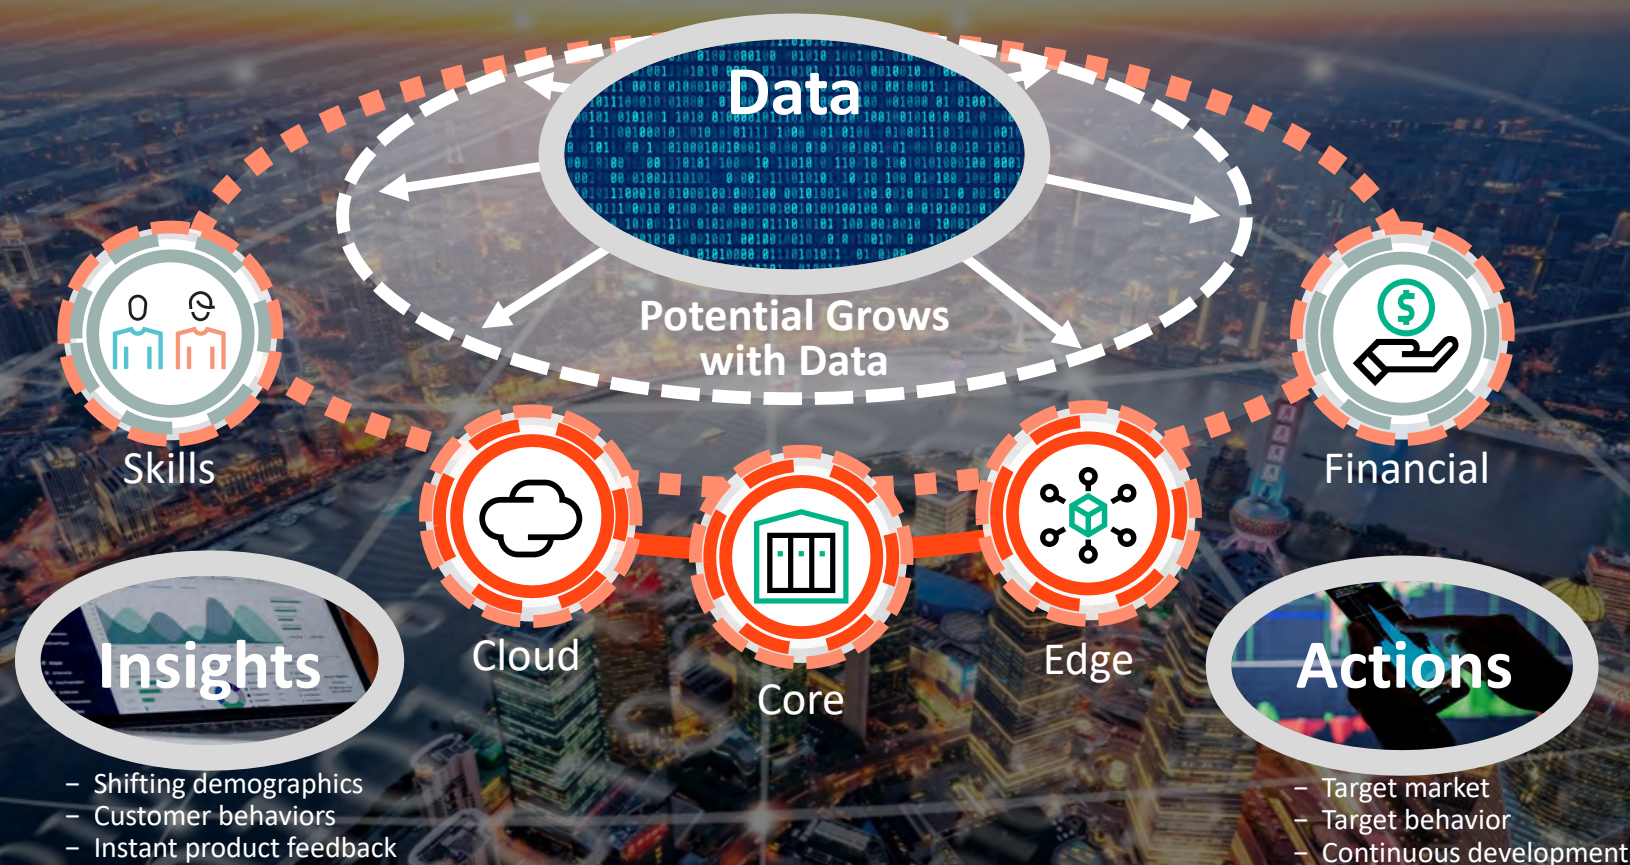

The edge has arrived

More Data – More Potential for Transformation

More Data – More Complexity from Technology, People, and Business Model

Unlocking the full potential of your data requires Intelligence

Summary

Next Big Revolution

- Edge Centric
- Cloud Enabled
- Data Driven

Operationalizing Intelligence is key

Today is tomorrow's "the good old days"
